Inspired by the soft rounded profiles which define seventies and eighties wall decor, the Rosa Collection is transitional in design, working beautifully with both classic and contemporary framing styles.

With its feminine rounded profile, its contrasting curves create depth with light and shade. Hand made in Italy by skilled artisans, the Rosa's gold and silver leafing process involves a staggering fifteen separate hand passages, gradually overlapping layers to achieve the final colour and timeless effect.

The antique black features a matte finish with subtle red undertones, and is aged by hand using natural wax and coloured powders.

The Rosa Collection uses environmentally friendly timber and solvent free water-based colours, making it ideal for conservation framing.

Available in 3 profiles and 3 timeless colours; Gold, Champagne and Antique Black.
